

REMARKS

As a result of the foregoing amendment, claims 21-40 have been cancelled and replaced by new claims 41-48 which recite a more limited embodiment of the present invention. In addition, the claims as amended avoid all of the various formal rejections under the 2nd and 1st paragraphs have been obviated. In particular, the claims now recite only the 5 or 6 member monocyclic N-heterocyclic derivatives which the examiner recognizes are enabled.

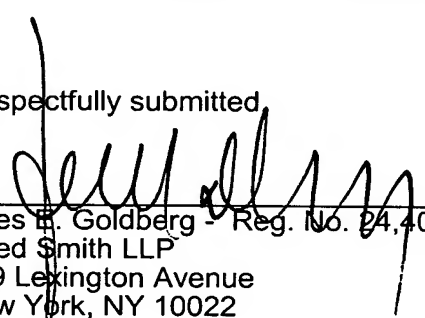

The same is true with the rejection set forth in the first full paragraph on 3 of the office action in that they are now limited to derivatives where prepared.

In addition, with respect to the substituents, the disclosure is fully enabling in as much as the heteroaryl and heteroaliphatic nature of the groups is no longer included.

Accordingly, in as much as all of the formal rejections have been obviated and there is no outstanding rejection on the art, it is submitted that this application is now in condition for allowance and favorable reconsideration and prompt notice of allowance are earnestly solicited.
